KYC is one time exercise while dealing in securities markets - once KYC is done through a SEBI registered intermediary (broker, DP, Mutual Fund etc), you need not undergo the same process again when you approach another intermediary.

In case of any change in KYC details, please submit a change request form along with the supporting documents with any broker, DP, mutual fund etc. with whom you transact. On verification of the same, CVL will download the updated details to all intermediaries which have registered your KYC.

The provisions of The Prevention of Money Laundering Act, 2002 (PMLA) and KRA Regulations (2011), has made it mandatory for all Market Participants to comply with the 'Know Your Client' (KYC) norms. In this regard, CVL has created the necessary infrastructure in order to handle the KYC in accordance to the KRA Regulations (2011).

As a result, all Investors will now have to submit their PAN card copy (which serves as Proof of Identity (PoI)) and Proof of Address (PoA) only once with any of the intermediary it deals with.

Validate KYC Cancel

Step-6 : On successful submission, below confirmation page will be displayed.

Note:

- Given screen confirmation is only for **“successful submission”** of Investor details like Name, DOB, Gender, State, Pin code and Address.
- All given parameters should match for the KRA to update the PAN status as **“Validated”**.
- In case of any credential not matching, the KYC will remain in **“Registered”** status only and will not be changed to **“Validated”** status for the given PAN.

Avoid these common Pitfalls to ensure your KYC gets “Validated”

Even if you have submitted physical Aadhaar, your KYC may not get validated because of below reasons:

1. Physical Aadhaar QR Code is not readable.
2. Aadhaar OVD data could not get validated with the issuing authority i.e. UIDAI.
3. PAN-Aadhaar seeding not done.
4. Email /Mobile validation failed.
5. KYC and Aadhaar database details not matched (*i.e. Name , DOB, Gender, Address & Pincode*)
6. Even where the confirmation on screen shows that the process has been completed, still it is not a guarantee that the Pan is KYC validated.

Note: Above pitfalls are the most commonly faced challenges and there can be other such challenges specific to individual nature of the PAN validation process.
